

I CLAIM:

1. A wall organizer, comprising:
  - a) a first slatwall member having a plurality of first grooves having a first center-to-center groove spacing between said first grooves, said first slatwall member is secured to a wall;
  - b) a second slatwall member having a plurality of second grooves having a second center-to-center groove spacing between said second grooves, said second slatwall member is secured to said wall above or below said first slatwall member; and
  - c) at least another first or second slatwall member secured to said wall above or below one of said first and second slatwall members.
2. A wall organizer as in claim 1, wherein said first and second grooves are T-shaped in cross-section.
3. A wall organizer as in claim 1, wherein said first slatwall member includes means for interlocking with another first slatwall member.
4. A wall organizer as in claim 1, wherein said second slatwall member includes means for interlocking with another second slatwall member.
5. A wall organizer as in claim 1, wherein:
  - a) said first slatwall member includes means for interlocking with said second slatwall member; and

13  
b) said second slatwall member includes means for  
interlocking with said first slatwall member.

14  
6. A wall organizer as in claim 1, wherein said first  
slatwall member is joined to said second slatwall member with a  
5 rabbet joint.

15  
7. A wall organizer as in claim 1, wherein:

16  
a) said first slatwall member includes a first bottom  
and a first top peripheral edge;

17  
b) said first top peripheral edge includes a first  
10 rabbet slot; and

18  
c) said first bottom peripheral edge of an adjacent  
first slatwall member fits within said first rabbet slot.

19  
8. A wall organizer as in claim 1, wherein:

20  
a) said second slatwall member includes a second  
15 bottom and a second top peripheral edge;

21  
b) said top peripheral edge includes a second rabbet  
slot; and

22  
c) said second bottom peripheral edge of an adjacent  
second slatwall member fits within said second rabbet slot.

23  
9. A wall organizer as in claim 1 wherein said first  
slatwall member includes a basewall portion and a plurality of  
25 T-shaped rib portions secured to said basewall portion.

26  
10. A wall organizer as in claim 1, wherein said second  
slatwall member includes a number of Pi-shaped portions joined  
25 to each other by a basewall portion.

11. A wall organizer as in claim 1, wherein said first and second slatwall members are extruded plastic.

12. A wall organizer, comprising:

5 a) a first slatwall member having a plurality of first grooves having a first center-to-center groove spacing between said first grooves, said first slatwall member is secured to a wall;

10 b) a second slatwall member having a plurality of second grooves having a second center-to-center groove spacing between said second grooves, said second slatwall member is secured to said wall above or below said first slatwall member; and

15 c) a shelf member secured to said wall below said first or second slatwall member.

13. A wall organizer as in claim 12, wherein said shelf member includes an inclined shelf portion with a transverse wall portion.

14. A wall organizer as in claim 12, wherein said first shelf member includes means for interlocking with said first or second slatwall member.

15. A wall organizer as in claim 12, wherein:

20 a) said includes a top portion having recess; and  
b) said first bottom peripheral edge or said second bottom peripheral edge is received within said recess.
